Laboratory Genetic Counselor

CombiMatrix Diagnostics is a CLIA-certified, CAP-accredited clinical diagnostic laboratory located in Irvine, California. CombiMatrix specializes in cytogenetic and cytogenomic testing in the areas of reproductive genetics and pediatrics. At CombiMatrix, our goal is to empower health care professionals to positively impact patient care through the delivery of innovative, DNA-based clinical services.

**Job Description:**
CombiMatrix Diagnostics values genetic counselors as key players in the provision of high-quality genetic testing services. We are seeking an enthusiastic, self-motivated genetic counselor with an interest in molecular genetics to join our Genetic Counseling Services team. This position will involve telecommuting from a home office and occasional out-of-state travel. The Genetic Counseling Services Team is responsible for handling clinical, technical, and scientific client inquiries; performing high-level scientific review of laboratory results; developing educational materials; and providing clinical support to Sales, Marketing and Client Services.

As a Laboratory Genetic Counselor with CombiMatrix, you will have opportunities to:
- Assist in expanding the laboratory’s clinical services
- Develop and deliver professional educational presentations
- Author and edit marketing materials
- Participate in publication of collaborative studies
- Present at national scientific meetings
- Provide training to the sales team regarding the clinical uses of our test offerings

**Key Responsibilities:**
- Coordinate CombiMatrix’s Result Support Program
- Assist with Quality Assurance/Quality Control of test results
- Provide medical/scientific support for Clients, Sales and Marketing

**Position Requirements**
The ideal candidate is a detail-oriented, enthusiastic self-starter with a strong interest in molecular genetics and the ability to simultaneously work on multiple ongoing projects with minimal supervision.

**Required:**
- Masters Degree in Genetic Counseling or equivalent
- ABGC Board Certification (or equivalent board, e.g. ABMG, CAGC)
- Minimum 3 years of experience as a clinical or laboratory genetic counselor
- Superior written and verbal communication skills (please submit a letter of intent with your application)

**Preferred:**
- Interest in being part of a dynamic small company environment
- Previous experience in a cytogenetic or molecular laboratory

**Compensation**
This is a full-time position with a competitive salary and benefits package. Salary will be based on data from the NSGC Annual Salary Survey and will involve adjustments based on the applicant’s state of residence and years of relevant experience.

Please send cover letter and CV to Michelle Strecker at: mstrecker@cmdiagnostics.com
